Testimonials

★★★★★

Great App Video Kiosk is an awesome application, does exactly what it says, no bug, no hassle, it just works. Take the device on and off, the app just start by itself and start playing. Great work.

– Giovanni Frino

Hello! I currently use the **Video Kiosk** software and it's great- I have it deployed on a number of Tronsmart MK908 and MK 808II devices

– D. Barry

Video Kiosk – Android

Overview Specifications Screenshots FAQ User Manual Tutorials Reviews Support Widgets

Turn your Android device into an easy to use, reliable, robust, secure Android kiosk to loop video, images, and web pages in minutes. Easy to use, you'll have your Android TV | tablet | phone playing videos, images, and web pages and running unattended, reliably and robustly with minimal set up. It comes with optional advanced features, such as integrated Google Drive download for remote update, secure Kiosk Mode for access management of interactive displays, remote management, advanced content loop control and scheduling, overlays, backgrounds and flexible screen displays – full screen for video loop player or digital signage, split screen for digital signage with widgets.

Features

Easy

- **Easy Cloud download.** Automatically and remotely update your content using the cloud
- **Easy to play everything.** Plays **video | images | web pages** in a loop
- **Easy to use as an Interactive Kiosk.** Click through to URL (local file or content on the internet) or an App on the device
- **Easy to use.** With a **simple 2-step installation**, you'll have your video kiosk up and running in minutes, playing your content in a loop, unattended. The only thing you need to do is turn the screen on – Video Kiosk takes care of the rest.

Flexible

- **Flexible display modes**
 - Use **Full screen** display for video loop player.
 - Use for **Digital Signage** with full screen display or split screen for Digital Signage with widgets.
 - Use with touchscreen overlays to create an **Interactive Touchscreen Kiosk** on a tablet. Activate hotspots using touchscreen or key. Click through to URL (local file or content on the internet) or an App on the device.
- **Flexible Content Loop Control.**
 - the **Default Playback Behavior.** If you have not configured a Playback Order, Video Kiosk will play the contents of the Media Folder in alphabetical order
 - **Control Content Loop Playback Order.** Control the content loop playback order using a playlist, a pickone folder or the file and path order
 - Use a **Playback Schedule.** Create a schedule using Android Calendar, a Google Calendar or an XML schedule file. Update remotely using a cloud service
 - Control Playback using the **Device Location** or **Motion Detection**
- **Flexible Display features.**
 - Customize the screen when using Digital Signage Widget Mode. Display multiple widgets and URLs in resizable widget areas.
 - Use Overlays to display graphic in front of the media
 - Use backgrounds to display background images behind the media or to play background audio
 - Customize timers to control display time and fade time between media
 - Customize the screen orientation – vertical or horizontal
 - Option to display clock when no content scheduled
- **Flexible Device Control features.**
 - Control the TV with HDMI-CEC commands
 - Scroll to next media file using keyboard, remote control, swipe gestures, gamepad

Robust

- **Secure.** Video Kiosk has security options for controlling access to the Kiosk software and for controlling access to the device
 - Password protection
 - Restrict access to device controls, especially for interactive devices
 - Lock down Kiosk on rooted devices
- **Reliable.** Video Kiosk has built-in logic to recover from common sources of playback interruption.
 - Starts playing content loop when device is restarted or awakened from sleep
 - Dims screen on battery-powered devices when battery power is low
 - Identifies unplayable media and skips it
 - Identifies errors are occurring and automatically restarts the kiosk
 - Interactive kiosk returns to content loop when tablet not in use
 - **No down time required when updating.** If the video loop changes because you have updated it, the new video loop will play the next time the content loop starts.

Remote Management and Remote Update

- **Remote Update.** Remote content loop update using integrated Google Drive or another cloud service, allowing you remotely update many devices simultaneously.
- **Remote Management.** Remote device status reporting
